## WE KNOW WHAT A SMALL HUMAN BEING NEEDS – FREEDOM

By removing three bars from a cot bed you will open the very first door to the world of small but great discoveries for your child. The bed offers three possible heights for adjusting to your child's changing needs. Now the baby can freely travel around the room and get to know their space. And you will make a good use of the big, comfortable changer over the gap between the dresser and the he wall.

# 4 YOU YOUNG

First read books, first diary pages filled with words, first CDs with favorite songs. It's a good moment to choose the furniture and accessories together with your child.

## BEDDING WITH A DANDELION CLOCK PATTERN

A soft cotton bedding with a dandelion clocks pattern, decorated with a yellow trimming.

## BISO DESKTOP LAMP

A stylish desktop lamp, which will become an original accessory in your interior due to its interesting shape.

### THREE IN ONE

When your child will slowly start to enter the adult world, the room will change as well. When the child does not need the bars anymore, you can turn a cot bed into a child bed and a desk. Impossible? Not anymore! When you turn the frame of the cot bed upside down, you will create a stable and safe desk. The bars may be used as hangers for organizers, which will keep important little objects in order. The dresser, now without a changer, will be a perfect storage for clothes and toys. The room will be complemented with a bookcase: the place for your child's favorite titles.

# MEEE

Furniture or toys? Both! Jolly shapes invigorate senses and child's imagination. They also invite to play – a cot bed may be rocked like a cradle. When the handles are looking at the baby with their big eyes, they open a world of emotions for the child: happiness, interest and amazement.

## WALL STICKERS IN THE SHAPE OF DOTS

The set consists of 23 dots, which are ideal for creating a unique design on the wall of your baby's room.

## WOODEN CARS

Toys which will engage creativity – not only child's.

## HERE, EACH DAY IS A GREAT ADVENTURE!

Do you know that a special structure of MEEE cot bed has a cradle function, which may be put into motion not only by the parent, but also by the child? However, when the baby falls asleep or gets tired with playing, the function can be locked to still the senses. Some bed bars are designed especially to make a knocking and ramming sound, while others stimulate the vision with their varied colors. Three, two, one, go: the game is on!

## COLLO FLOOR LAMP

## THE CHILD'S TWO FIRST YEARS ARE THE TIME OF AN INTENSIVE DEVELOPMENT

This is when the child's vision burgeons. Evolve is a furniture collection which is designed to picture colors and present a suitable selection of shades in order to boost child's vision. At the beginning, infants can only see the contours, simple vertical and horizontal lines, and the best contrast they see is the one between black and white. However, in order to prevent the boredom from appearing in baby's room, we have added our favorite colors: yellow, blue and red. An additional asset of the collection is a textile cover which holds familiar smells, allowing the child to get used the space and to recognize it as a safe and friendly one.

# FOR EACH MOOD SWING

Swingy is a cuddly toy, which changes accordingly to the mood swings of your baby. The child itself is able to decide whether the soft friend will be cheerful, sad or maybe even sleepy. Swingy is a perfect companion for travelling around the world of shapes and textures. If you fill it with safe feathers, it will become a perfect toy. Filled with rice grains, beans or groats, it will turn into a rattling toy. Cherry stones or mustard seeds put into the toy will have the same effect as the hot water bottle, making your child forget about the colic. Swingy loves spending time with family and it establishes relations very literally – thanks to colorful ribbons, the toys can be combined into a multi-generational family.

# ANNA DUSZA FOR VOX

Pirate treasures, Indian tippies, Innui kisses. Your child is able to visit all continents within just a few hours and without leaving home. It is not surprising that after such demanding escapades sleeping is a precious commodity. Natural cotton bedding will turn your baby's falling asleep into yet another adventure. Unique pattern, designed by Anna Dusza, has been marked on the fabric with paints which are safe for babies. This design comes from the world, in which trees and flowers have only contours awaiting to be filled with dreams. Your baby won't ever feel alone, because the cheerful animals will become the companions. A happy dog, cat, fox and bear will look at your child from the walls, and the well-known teddy bear may even leave the bedding and turn into a soft cuddly toy. After all, in dreams everything is possible.

# BLANKETS AND PILLOWS

In cooperation with Martello brand, we came up with blankets and pillows, which can accompany the baby in their bed, an afternoon nap and during a walk. We trust Martello, because for many years they have been creating products for babies made of organic cotton, for which it received GOTS certificate. It means that during each stage of production, the creation of goods is controlled and therefore we are sure, the products do not contain any toxic substances and are 100% safe for babies. Sets are available in three colors: orange, mint and neutral grey.

Bright and muted colors give an opportunity to add colorful decorations. Reglisse grows up alongside the child, and this is why the cot bed has an adjustable mattress base, which is adapted for the child's development. When the child outgrows it, don't worry – you will easily turn it into an infant bed.
